Selected Projects — GoHighLevel & AI Automation

DentalFlow — AI-Powered Dental Clinic Automation System

GoHighLevel, Conversation AI, CRM Pipelines, Workflow Automation, HTML, CSS & JavaScript. Built a complete dental clinic automation system featuring a high-converting landing page, lead generation forms, AI receptionist/chatbot, appointment booking, CRM automation, email/SMS reminders, cancellation and rescheduling workflows, no-show recovery, patient reactivation, automated review requests, and custom responsive thank-you pages.

Real Estate CRM & Automation System

GoHighLevel, CRM, Conversation AI & Workflow Automation. Built a complete real estate lead management system with a custom landing page, lead capture, AI chat assistant, lead qualification, CRM integration, property viewing calendar, appointment notifications, reminders, lead tagging, segmentation, opportunity pipeline management, post-viewing follow-ups, cold lead reactivation, email marketing, drip campaigns, and trigger-based workflows.

Selected Projects — Frontend Development

CleanFlow — Cleaning Services Landing Page

React.js, Tailwind CSS, Lucide React, React Icons. Built a responsive service-business landing page from scratch with scroll-aware navigation, animated hero video modal, services grid, custom hover effects, testimonial carousel, FAQ accordion, booking form validation, success confirmation modal, smooth scrolling, and responsive layouts.

FluxFame — AI Automation Website

React, Tailwind CSS, JavaScript, Framer Motion, Swiper.js, HTML5 & CSS3. Developed a modern responsive website with premium glassmorphism UI, smooth animations, reusable React components, conversion-focused layouts, responsive design, and optimized frontend performance.

Photography Website with Admin Panel

React, Tailwind CSS & Node.js. Built a professional photography portfolio website with an admin dashboard for managing galleries and content, smooth animations, stylish mobile-friendly UI, and responsive layouts.

Plant Care Website — Full-Stack Project

React, Node.js, Express, MongoDB, Firebase & Tailwind CSS. Built a full-stack plant-care web application featuring plant listings, an upload page, backend APIs, Firebase authentication, and user-managed uploaded plants.

Azaan — Call to Prayer

React, Tailwind CSS, Framer Motion & Responsive Design. Built a frontend Islamic web application that plays live five-waqt Azaan automatically based on the user's country and prayer times. Includes a peaceful UI, smooth animations, daily short duas, Surah audio playback, and responsive optimization.

Restaurant Frontend Website — Multi-Page Website

React & Tailwind CSS. Developed a modern, responsive multi-page restaurant website focused on clean UI/UX, elegant layouts, user-friendly navigation, and optimized frontend performance.
